

ABOUT OUR COMPANY

- ▶ I.C.E. is a state-of-the-art integrator of automated systems. We provide custom industrial control panel creation, Programmable Logic Controller (PLC) programming and professional integration services.
- ▶ We are a UL508A listed panel shop with approximately 5,000 sq. feet of shop space.
- ▶ We take pride in building all of our panels to specification regardless of the requirement.
- ▶ I.C.E. works closely with UL to ensure our product is up to the latest standards for today's industrial market.
- ▶ All panels are hot tested before leaving our facility to ensure the proper wiring and proper functionality of all components.
- ▶ We can provide you with a complete integration installation package on any size project from the largest to the smallest.
- ▶ We have the ability to provide you with not only Standard Installation Services but Advanced Networking Services, including fiber optic cabling and terminations.
